Our Engineering Services

- » Building code interpretation
- » Certified air & water testing, adjusting & balancing
- » Computer-aided drafting (CAD) support
- » Energy audits & evaluations
- » Engineering design, analysis & evaluation
- » Equipment selection & specification
- » Indoor air quality analysis & reports
- » New technologies
 - Under-floor air
 - Energy recovery
 - Central plant optimization
- » Performance contracting
- » Permit & construction plan preparation
- » Retro-commissioning
- » System renovations

Transforming options into opportunities

In today's construction and facility management environment, you have to confront a complex array of economic, regulatory, technological and other issues that can severely impact your efforts. That's where Debra-Kuempel's staff of knowledgeable, experienced engineers can help.

Engineering Simplified

Our professionals know local construction conditions and understand the local regulatory environment. They can work with you to simplify and transform difficult engineering, design and analysis issues into opportunities for improving facility performance, reducing costs and increasing the return on your investment.

Whether your project is commercial, industrial, institutional, educational or scientific, our experts can help you evaluate system demands, resolve construction issues, and satisfy permitting and other requirements. After system installation, our engineers can test, adjust and balance it for maximum operating efficiency and long-lasting value.
