

AWARD-WINNING SAFETY

At DeBra-Kuempel, safety is a way of life. It's a core value within our company that plays an important role in every project we work on and with every person we employ. The DeBra-Kuempel safety program has won a number of prestigious awards, including:

- » NECA
- » ISNetwork Certification

Building Better. Building Faster. For Over 70 Years.

DeBra-Kuempel Mechanical has over 70 years of experience providing clients with total mechanical solutions, including HVAC and mechanical services that address the full lifecycle requirements of facilities.

Using BIM and CAD technologies, the DeBra-Kuempel team can help deliver a project faster and more cost effectively than what is typically possible with other project management strategies. Working in collaboration with other project team members, DeBra-Kuempel BIM specialists build the integrated graphics and data system needed to assess a facility through three-dimensional visualization. We can also work with consultants to produce the required contract documents, resulting in a seamless BIM experience.

Identify. Resolve. Evaluate.

Before construction begins, the DeBra-Kuempel team can help identify and resolve potential conflicts. We can also evaluate various system and equipment options to find the best solutions and develop efficient trade and purchasing schedules. Then, when the building is turned over to the owner, data included within the BIM system can be used to enable more efficient facility management.

Contracting. Not Subcontracting.

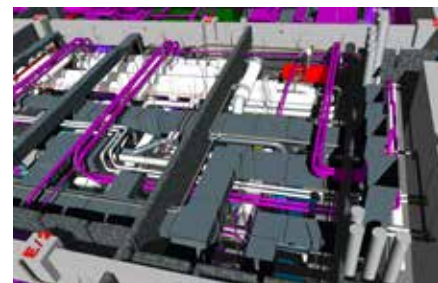

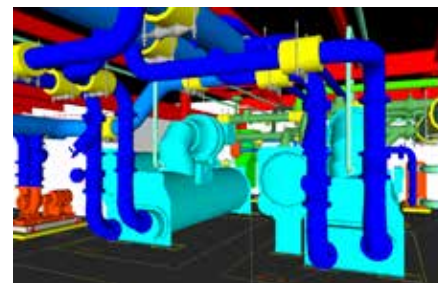

We don't subcontract BIM work—all of our BIM experts are DeBra-Kuempel employees. We also use a common database for our CAD estimating, plumbing, and sheet metal prefabrication systems. This is valuable because it:

- » Reduces project costs
- » Helps reduce conflicts in the field
- » Increases site safety
- » Helps optimize prefabrication designs for manufacturability
- » Provides efficiencies when we manufacture large runs for just-in-time delivery

400 BIM Professionals.

Near-unlimited Knowledge.

As part of EMCOR Group, Inc., DeBra-Kuempel has access to over 400 BIM professionals within the EMCOR knowledge network. This gives us the extensive resources needed to deliver BIM projects of virtually any size or complexity.
